SERVICE DES MANIFESTATIONS PROMOTIONNELLES

Attached to the Cabinet of the Ministry of Trade, Industry and Handicrafts, the Promotional Events Service (SMP) is tasked with overseeing the organisation and monitoring of commercial, industrial and artisan promotional events in Côte d'Ivoire.

To this end, it receives and processes applications for authorisations and approvals to organise promotional events and provides institutional support for the organisation of promotional events initiated by foreign countries

The SMP develops and publishes the annual calendar of promotional events and ensures the application of regulatory provisions concerning the organisation of promotional events across the entire national territory

WORLD CITY**

TEL : (+225) 27 22 30 22 91

Foreword

The calendar of fairs, exhibitions, shows and promotional events in Côte d'Ivoire is an official publication of the Ministry in charge of Commerce. It presents a broad selection of events from a large number of sectors which, together, highlight the economy of Côte d'Ivoire.

The development of this calendar is stipulated in Decree No. 2018-546 of 6 June 2018 on the definition and organisation of commercial, industrial and artisan promotional events in Côte d'Ivoire

This text, which repeals Decree No. 95-387 of 13 April 1995, establishes the framework for the promotional events sector, which has become increasingly dynamic in recent years in Côte d'Ivoire.

The design of this document allows for better planning of the organisation of promotional events and thus better promotion of Côte d'Ivoire as a destination.

The electronic and printed versions of the calendar are distributed to all promotional event organisers, businesses, municipalities, Chambers of Commerce, public and private bodies, consulates, embassies and anyone interested in the sector.

Outside of Côte d'Ivoire, the calendar is distributed to Ministers of Foreign Affairs worldwide. It constitutes a national reference document for the Ivorian Government, which promotes it during official visits to institutions in other countries.

The electronic version is available for free consultation on the website of the Ministry of Commerce and Industry (www.commerce.gouv.ci) and on the official portal of the Government of Côte d'Ivoire (www.gouv.ci).

Minister's Foreword

The Ivorian presidential election of 25 October 2025 renewed the confidence of the Ivorian people in His Excellency the President of the Republic, Alassane OUATTARA, for a five-year term of office. This new mandate marks a decisive milestone: that of accelerating the structural transformation of our economy and consolidating a strong, sovereign and value-creating Côte d'Ivoire, notably through:

- an economy resolutely oriented towards local processing and industrialisation;
- more efficient energy, digital and logistics infrastructure;
- a modern and competitive agricultural sector;
- a structured, innovative and employment-generating industry;
- a dynamic private sector, driven by genuine national champions

Since 2011, our country has undergone a profound transformation. The restoration of State authority, the consolidation of peace, the strengthening of institutions and the securing of the national territory have made it possible to establish a stable and attractive environment. With an average growth rate of 8.2% between 2012 and 2019, Côte d'Ivoire has established itself as a regional economic driving force.

For 2026, growth is projected at 6.7%. This momentum must now translate into greater industrialisation, more local processing and better organisation of our markets.

Upon assuming office at the helm of the Ministry of Commerce, Industry and Handicrafts, I have set a clear ambition: to make this Ministry a genuine lever for economic development, strategic support and tangible results. A Ministry that protects our operators, combats unfair practices and sustainably structures our sectors.

The calendar of trade fairs, exhibitions and shows constitutes, in this regard, a major political and economic instrument. It organises commercial activity, enhances the visibility of our sectors and contributes to the international standing of Côte d'Ivoire as a destination. This document provides a comprehensive overview, by month and by sector, of the events scheduled across the entire national territory in 2026. It serves as a strategic tool for our national enterprises in their pursuit of market opportunities and for our international partners in the planning of their investments.

I wish to note that this eighth edition lists 186 events scheduled for 2026. The 2025 edition recorded 294 events with an implementation rate of 49,65%. These results call upon us to act: we must improve the organisation, discipline and performance of our events ecosystem.

It is for this reason that I urge economic operators to take full ownership of this calendar and to make it a genuine lever for performance. The year 2026 must be one of rigour, competitiveness and economic conquest.
